

## Pet Owners:

VDI Laboratory blood tests can be run by any veterinarian in the U.S., including your family vet. To obtain test pricing, and discuss how these tests may best be used with your pet, please bring this printout to your veterinarian.

## Veterinarians:

VDI Laboratory offers a unique line of specialty blood tests which can be used in a variety of clinical settings including:

- Wellness screening
- Diagnostic workups
- Therapeutic monitoring
- Acute care triage

Your client has expressed a particular interest with VDI tests that focus on cancer management and general wellness:

 <p><b>Comprehensive Health Screen</b></p>	 <p><b>Disease Prevention &amp; Immune Support</b></p>	 <p><b>Cancer Management</b></p>
<p><b>IN@Se</b></p>	<p><b>VitDCANINE</b></p>	<p><b>TKCANINE CANCER PANEL</b></p>
<p>Detect hidden inflammation and underlying disease including the early stages of cancer.</p>	<p>Measure vitamin D levels; when insufficient, establish supplementation dosing level and monitor response.</p>	<p>Detect the presence of cancer in dogs with suspicious signs. Monitor the effectiveness of therapy and remission status.</p>

For more information on these, and our full line of specialty blood tests, please visit or call:
